**Subject:** microsoft settlement

The Microsoft settlement as stands is horrific.

In fact, it is a very good example of what is wrong when companies are allowed to buy out the government.

It is a slap in the face to the American people. I personally feel sold out by the DOJ for even considering this.

Anyone who looks at this can tell the difference the Bush administration has had in this case.

SOLD OUT.

I fully agree with the information in the following link.
